⚡ Plug & Power Up with eFacade LITE

eFacade LITE by Mitrex is a pre-engineered solar facade system with advanced building-integrated photovoltaic technology (BIPV) created to accelerate solar adoption without compromising performance. A ventilated rainscreen system with a hidden extruded aluminum profile encasing a layer of high-efficiency solar cells and a glass facing, each panel is a powerhouse of energy.

Designed for projects seeking rapid deployment, lower costs, and simplified electrical integration, LITE panels feature a built-in PowerBar that enables plug-and-play wiring on site. With two panel sizes and five color options, eFacade LITE delivers energy performance in a system that's optimized for streamlined delivery and long-term durability. It's the ideal solution for retrofit projects, budget-conscious developments, or buildings that require simplicity and speed.

🔌 Plug & Power Up

Offers high energy output—up to 18W/SF—without compromising durability. With pre-engineered wiring, it features a plug-and-power setup that removes the need for additional solar system design or engineering.

🎨 Colors & Sizes

Available in five colors with a satin glass finish, this solution provides a minimalist aesthetic. Available in two standardized sizes and 11 panel layouts preserving design flexibility.

☔ Rainscreen System

Designed as a ventilated rainscreen, it improves thermal performance, reduces moisture, and boosts the building envelope's durability and efficiency.

♻️ Sustainability

Supporting a lower-carbon built environment, it generates clean energy and is made with recyclable, low-embodied carbon materials.

🛡️ Certifications

Independently tested and certified, it meets key international standards for wind and impact resistance, as well as UL safety requirements.

🔥 Fire Safety

Built with non-combustible glass and a tested backing system, it meets strict global fire safety standards, including EN 13501 A2-s1,d0 and NFPA 285.

🌡️ Performance

Rated for extreme conditions, it withstands UV exposure, heavy rain, high winds, and freeze-thaw cycles, operating reliably from -40°C to +85°C.

🔧 Maintenance

Engineered for longevity, it features self-cleaning glass and durable surface treatments, requiring minimal maintenance over a 25-year power performance warranty.

💰 Incentives

Projects may qualify for sustainability incentives such as government rebates, green energy grants, and low-cost financing across North America.

eFacade LITE Crafted For Perfection

eFacade LITE Package Components

Each eFacade LITE package comes with 150 SQFT of material and the following components. The amount of the SunTiles may vary depending on the layout.

Lifetime Warranty

- Mitrex solar facade products physically last the lifetime of the building and beyond as a building envelope product.
- The warranty guarantees that the energy generation will have a minimum energy output of 80% by year 25. However, energy generation will continue after the warranty period ends for as long as the panels are on the wall.
- Our lifetime warranty ensures reliable, durable facades as the panels require minimal maintenance and there is zero panel replacement needed for the building lifetime.

eFacade LITE Colours Available

Mitrex eFacade LITE is available in five clean, neutral color tones to blend with any project. These curated options are designed to complement a wide range of architectural materials such as aluminum panels, GFRC, EIFS, and ACM. Whether your design calls for a bold contrast or understated elegance, LITE's palette offers the flexibility to enhance visual cohesion across facades.

eFacade LITE System Add-On

To ensure a clean and complete installation, non-active filler panels are available upon request. These panels are designed to integrate seamlessly with the eFacade LITE SunTile panels and can be cut to size on site, allowing installers to finish wall edges and corners with precision.

This flexibility ensures a consistent and professional appearance across the entire facade, regardless of the specific dimensions or geometry of the installation area.

Note: This material is delivered upon request - Ask Us!

Features

Adaptable Modules

LITE panels can be cut on-site to fit any wall dimension, allowing you to complete every wall, corner and edge without fasteners or installation hardware in sight.

Same Installation Method

Even when cut on site, eFacade LITE add-on modules follow the same installation method as standard panels, keeping the process simple, consistent, and familiar for installers.

Mitrex eFacade Products Comparison

Mitrex offers three distinct solar cladding solutions—eFacade LITE, eFacade PRO, and eFacade PRO+—each engineered to meet varying project needs in terms of design flexibility, performance, and scale.

The table below provides a detailed comparison across key features such as colors and finishes, sizing options, weight, system compatibility, and testing standards. Whether you're prioritizing affordability, customization, or advanced performance, this side-by-side overview will help you identify the best fit for your project.
