

Energy Generating Building Materials: eFacade PRO+ Product Datasheet

∮ eFacade PRO+

eFacade PRO+ by Mitrex is a highly customizable building-integrated photovoltaic (BIPV) system that enables architects and developers to realize any facade concept without compromising on solar performance. PRO+ is designed to support unique project requirements, whether you're building with complex geometries, specific color palettes, or non-standard system types.

Each panel is engineered to deliver up to 18W/ft² of solar generation while allowing complete freedom in dimensions, shapes, and finishes. With compatibility across ventilated rainscreens, unitized curtain walls, and prefabricated facade assemblies, eFacade PRO+ adapts to the most advanced and demanding architectural applications.

Mitrex collaborated with Gensler, serving as product design

Product Design Consultant **Gensler**

ARCHITECT: Silverstone OWNER:

Binghatti Developers,

Dubai, United Arab Emirates

Installation System

Compatible with rainscreen, unitized, stick-built, and curtain wall systems—also available as prefabricated panels, slab-to-slab connections, or insulated wall assemblies.

Custom Aesthetics

Allows complete design freedom with limitless color options, shapes, graphic overlays, and finishes like satin, matte, glossy, and wood grain—enabling full customization to suit any architectural vision or branding need.

Sizes & Shapes

Fabricated in nearly any size or shape, accommodating everything from compact units to oversized formats—including tilted panels, rectangles, triangles, curves, and integrated corners.

Supports long-term carbon reduction by generating clean energy and incorporating recyclable, low-carbon materials. It's designed to help projects meet LEED, Passive House, and other sustainability standards.

Certifications

Meets safety standards including UL 61730, UL 61215, ASTM E1996 for impact resistance, and ASTM E330 for wind load performance.

consultant, for eFacade PRO+ (Aluminum Honeycomb Backing)

Fire Safety

Features a non-combustible glass and a tested backing system to meet strict global fire safety standards, including EN 13501 A2-s1,d0 and NFPA 285.

Perfomance

Built for long-term durability outdoors, tested for UV resistance, temperature extremes, and mechanical impact, and performs reliably between -40°C and +85°C.

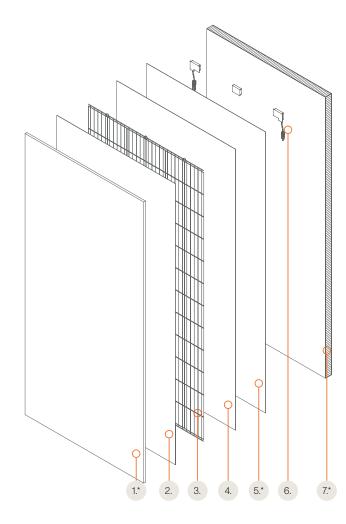

Maintenance

With self-cleaning glass and corrosion-resistant materials, this system requires minimal maintenance. Its sealed photovoltaic design ensures long-term reliability and is backed by a 25-year power performance warranty.

§ Incentives

Projects using this system may qualify for sustainability incentives such as government rebates, green energy grants, and low-cost financing across North America.

Mercedez-Benz **BUILDING TYPE:** High-End Residential PROJECT SIZE: 7,475 SQFT POWER OUTCOME: 620kW

Super Satin Glass

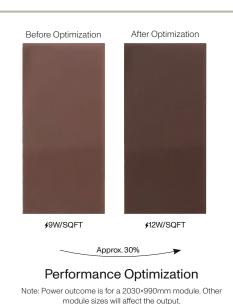

Solar in any Color, Pattern, or Texture

There are no limitations when it comes to architectural creativity with Mitrex eFacade PRO+. This cutting-edge solar facade system empowers designers with unmatched freedom to bring any vision to life.

Whether you have a specific color in mind, are targeting an exact RAL or Pantone® shade, or want to replicate the look of natural stone, concrete, wood, or metal, or even incorporate bold graphic visuals, eFacade PRO+ can seamlessly match virtually any material, color, or texture using advanced surface treatment technology. Each panel turns the building envelope into a solar-powered canvas, blending high-performance energy generation with complete aesthetic freedom. With eFacade PRO+, beauty and sustainability are seamlessly integrated, allowing architects to design truly distinctive facades without compromise.

Module Finish

Unlimited customization in pattern, texture, and color to meet any architectural vision

Unlimited Color

More custom colors are available. Ask one of our representatives how to get a sample color for your project.

○ Design Flexibility

Full design flexibility with customizable panel sizes (up to 125in x 80in), curved modules, and integrated corner solutions

Facings Variety

Available in reflective, semi-reflective, satin, matte, glossy, and specialty glass finishes

For more information about the capabilities of eFacade PRO+, scan the QR code.

Unlimited Pattern Options

With Mitrex eFacade PRO+, the possibilities are limitless

Matching Regular Materials

Colors and Patterns Ideas

Mitrex eFacade PRO+ offers unlimited design possibilities with customizable colors, patterns, and finishes to match any architectural vision. From natural textures to bold, contemporary designs, the options are endless. Included here is a sample of our Genesis and Exodus color lines—just a glimpse of the wide range of aesthetics available through our advanced solar cladding technology.

Mitrex Genesis Series

Mitrex Genesis Solar Series seamlessly blends aesthetics with innovation, offering a diverse range of color options that can be optimized to meet any design vision. These advanced solar facings provide both energy generation and architectural versatility, redefining the possibilities of sustainable building design.

Experience the look and feel of our solar cladding.

Scan the QR code or visit www.mitrex.com to order your free Mitrex sample today.

Mitrex Exodus Series

Delivers a sleek, uniform aesthetic with a single-color design per module, ensuring a consistent and sophisticated look. While the color options are fixed, these high-performance solar facings seamlessly integrate renewable energy into any architectural project.

Note: To view accurate color sample visualization, please visit www.mitrex.com/bipv/colors-textures.

Size & Shapes Details

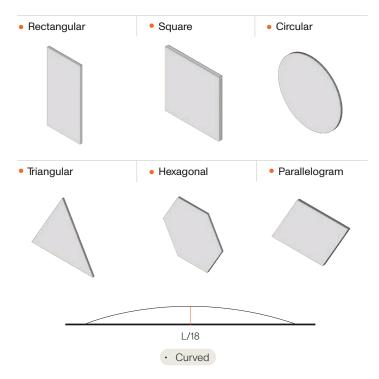

Size Capabilities

eFacade PRO+ can be fabricated in virtually any size, from compact modules to oversized formats. Available in fully customizable sizes up to 125 × 80 inches, PRO+ supports a wide range of shapes including tilted panels, rectangles, triangles, curves, and integrated corner panels.

Shapes & Curving Capabilities

eFacade PRO+ offers a wide range of shapes—from elegant circles and sharp triangles to precise hexagons and more unconventional forms. It also enables curved modules with a minimum radius of R=1800mm or L/18, adding a sleek, modern touch to any design.

Lifetime Warranty

- · Mitrex solar facade products physically last the lifetime of the building and beyond as a building envelope product.
- The warranty guarantees that the energy generation will have a minimum energy output of 80% by year 25. However, energy generation will continue after the warranty period ends for as long as the panels are on the wall.
- · Our lifetime warranty ensures reliable, durable facades as the panels require minimal maintenance and there is zero panel replacement needed for the building lifetime.

Testing And Certifications Details

Category	Test Name	Test Specification	Result
Acoustic	Sound Transmission Loss	ASTM E90	Sound Transmission Rating: CladiShield Rainscreen: 34; Claditized Unitized: 35; CladiFab Prefab: 55
	Salt Spray Resistance	ASTM B117-16	No deleterious effects.
Environmental	Laboratory Aging of Sandwich Construction	ASTM C481-99 (Reapproved 2016)	ASTM C273; C297; C364; C393 tests were reconducted after aging: the variation was +1.36 %, -5.90%; +2.55%; -7.95%. Note: Positive variation indicates no decrease in strength after aging.
	Resistance to Rapid Freezing and Thawing	ASTM C666/C666M-15	No visible change to panel
	Air Leakage Resistance	ASTM E283-04 (2012)	Qinf = 0.031 cfm/ft² or 0.155 L/s-m² at 300 Pa; Qexf = 0.024 cfm/ft² or 0.122 L/s-m² at 300 Pa
	Fluorescent UV Exposure	ASTM G154 -16	No visible change
	Water Penetration Resistance	ASTM E331	No water infiltration at 15 psf or 720 Pa
	Fire Endurance Test	ASTM E119 / CAN/ULC S101	Passed
Fire Safety	Exterior Wall Assembly Fire Test	CAN/ULC S134	Passed
	Fire Classification	EN13501	Rating: A2-s1,d0
	Tunnel Test	ASTM E84	FSI = 10; SDI = 200; Class A
	Non-Combustibility (ASTM E136)	ASTM E136	Passed
	Multi-Story Fire Test	NFPA 285	Passed
	Surface Burning Characteristics	CAN/ULC S102	FSR = 0; Class A
	Non-Combustibility (CAN/ULC S114)	CAN/ULC S114	Passed
	Combustibility Parameters (Cone Calorimeter)	CAN/ULC S135	Passed NBCC 2015 requirements
	Large Missile Impact Test	ASTM E1996 / TAS 201	Passed
Impact / Safety	Cyclic Pressure Loading	ASTM E1886 / TAS 203	Passed. Over 3,500 positive and negative pressure cycles were applied at ± 2880 Pa (60 psf), equivalent wind load of 165 mph.
Mechanical	Shear Strength and Shear Modulus	ASTM C273/C273M-18	Ultimate core shear strength = 1.01 MPa (147 psi); Core shear modulus = 10.9 MPa (1583 psi)
	Shear Strength by Beam Flexure	ASTM C393/C393M-16	Max core shear strength = 0.94 MPa (137 psi); Facing bending stress = 8.14 MPa (1180 psi)
	Flexure Creep Evaluation	ASTM C480/C480M-16	Net creep (in/day) facing - 0.029
	Density of Sandwich Core	ASTM C271/C271M-16	327 kg/m³ (20.42 lbm/ft³)
	Flatwise Tensile Bond Strength	ASTM C297/C297M-16	1.52 MPa (220 psi)
	Edgewise Compressive Strength	ASTM C364/C364M-16	37.85 MPa (5490 psi)
	Flatwise Compressive Strength	ASTM C365	1.92 MPa (278 psi)
	Flexural Strength	ASTM C880/C880M-15	22.83 MPa (3311.21 psi); No failure
	Tensile Properties of Adhesive Bond	ASTM C897-08 (2016)	Adhesive bond did not fail
	Damage Resistance	ASTM D7766/D7766M-16	No panel deformation
Structural	Structural Performance	ASTM E330	+/-80 psf or +/- 3840 Pa; no failure
	Thermal Resistance	ASTM 1363-11	0.20 m ^{2.} °C/W (1.12 hr·ft ^{2.} °F/BTU)
Thermal	Linear Thermal Expansion	ISO 10545-8	11.28 × 10 ⁻⁶ /°C
PV Quality	Terrestrial Photovoltaic (PV) Modules - Design Qualification and Type Approval	IEC/UL 61215	Passed
PV Safety	Standard for Photovoltaic (PV) Module Safety	IEC/UL 61730	Passed

Request Your Mitrex Architectural Box

The Mitrex Architectural Box is a curated toolkit that brings the potential of eFacade PRO+ directly to your hands. Designed with architects in mind, this box features a complete snapshot of our solar cladding system's capabilities — including a physical brochure, scaled-down corner and edge profiles, an active eFacade PRO+ sample, and a range of color chips showcasing our standard Genesis and Exodus finishes.

Whether you're exploring façade aesthetics, energy performance, or system integration, this box offers a tangible preview of what Mitrex can deliver.

Contact us at info@mitrex.com to request your sample box today. Let's build the future — beautifully and sustainably.

Mitrex Design Assist Service

Mitrex and Cladify partner with architects and engineering teams from the earliest stages of design to co-develop integrated building envelope systems that satisfy both performance objectives and aesthetic goals. Through a structured Design Assist process, we offer façade system modeling, engineering validation, energy simulations, mock-up testing, and prefabrication strategies to streamline construction and reduce life cycle costs.

Mitrex eFacade Products Comparison

Mitrex offers three distinct solar cladding solutions—eFacade LITE, eFacade PRO, and eFacade PRO+—each engineered to meet varying project needs in terms of design flexibility, performance, and scale.

The table below provides a detailed comparison across key features such as colors and finishes, sizing options, weight, system compatibility, and testing standards. Whether you're prioritizing affordability, customization, or advanced performance, this side-by-side overview will help you identify the best fit for your project.

	eFacade LITE	eFacade PRO	• eFacade PRO+
Colors & Patterns	5 color options	48 color options	Unlimited customizable colors & patterns
	Finish: Satin glass Thickness: 0.24in (6mm)	Finish: Satin glass Thickness: 0.24in (6mm)	Finish: Super satin, satin, matte, glossy, wood grain, aqualite, and more. Thickness: 0.12-0.47in (3.2-12mm)
